

SEAWIDE

Marine service LLC

Where reliability is essential , Seawide is your service partner.
We specialise in the service and supply of OEM quality marine engine spare parts, machinery and equipment.

“Overcoming barriers to performance is how groups become teams.” – John Katzenbach

www.seawide.ae

SeaWide Co. LLC. is an independent supplier of new, remanufactured, and used parts in marine industry. We offer an extensive package of parts for heavy duty engines, turbochargers, fuel systems and purifiers, compressors, water pumps, hydraulic systems, marine gearboxes, heat exchangers, propellers and propulsion systems, radio and navigation systems, instruments, and electrical equipment and piping valves.

We also supply new, remanufactured and used diesel engines and gearboxes.

Importance of supply chain, handling and selling high quality parts, excellent relationship with manufacturers and distributors around the world, together with an extensive product knowledge and furthermore the commitment to quality and service has made SeaWide an attractive and reliable partner for foreign governments, original equipment manufacturers, revision and repair shops, intermediaries and end-users.

www.seawide.ae

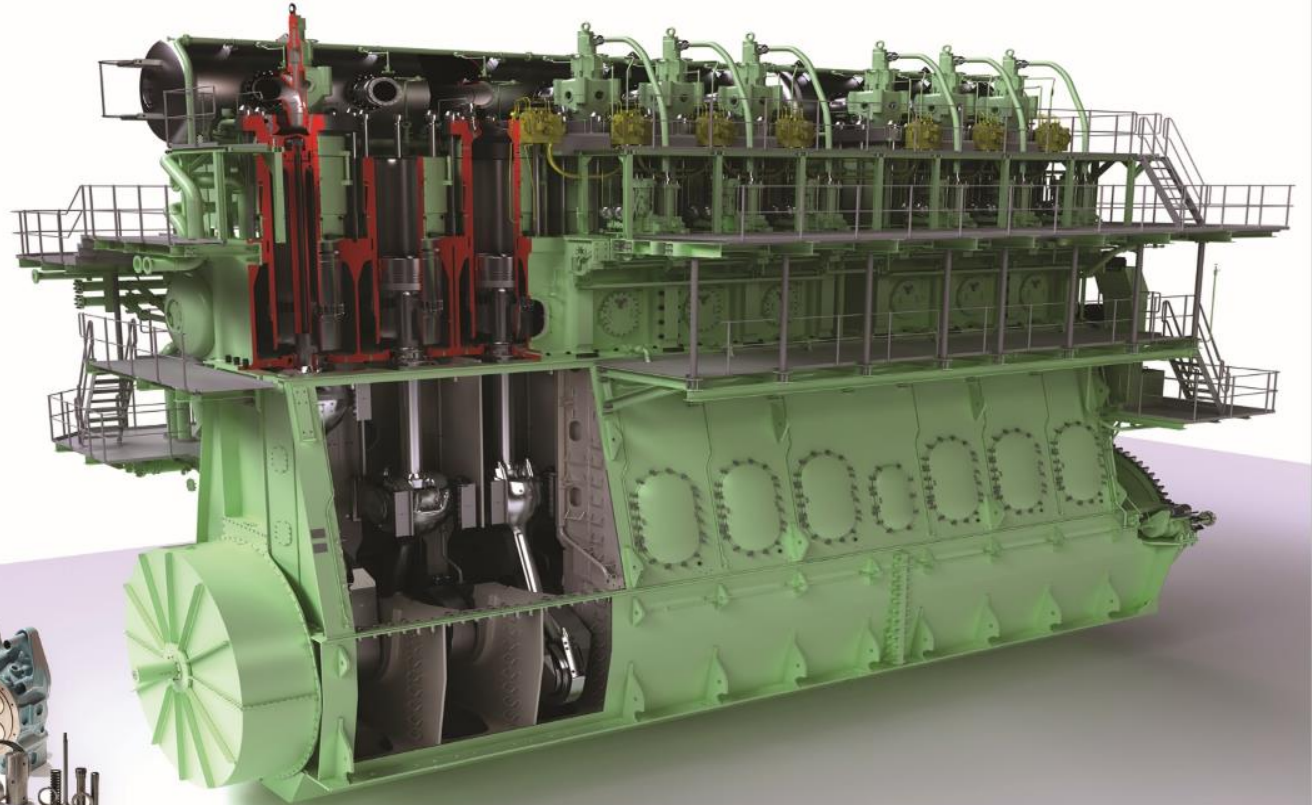

Having strong relationship with OEM and Aftermarket manufacturers, we are able to supply high quality products with competitive prices. SeaWide's success is based on making efficient business for customers.

We have fast access to many thousands of different parts and components. Most parts can be delivered from our own warehouse with very competitive price. However, it's our attention to offer good service that sets us apart. Real service means more than a fast delivery of parts. It often means providing solutions to additional technical problems. For instance, we can advise our customers which part would be the most suitable for a specific engine or for a special application; we take care of technical schemes, additional information as to where and how the part should be installed.

SeaWide handles these activities not only for clients in the UAE but for governments, original equipment manufacturers and intermediaries throughout the world, All of which know and appreciate our comprehensive range of parts and excellent logistic support services.
